## Newsletter – Winter 2002

### MD/PhD Student Research Forum and Open House: 19 August 2002

#### THANK YOU!

The UBC MD/PhD Program staff and students express their sincere thanks to the Vancouver Hospital & Health Sciences Centre and the St. Paul's Hospital for their continued funding support to the Program.

Both the Vancouver Hospital & Health Sciences Centre and the St. Paul's Hospital provided an annual donation of \$5,000.00 to support the operational requirements of the UBC MD/PhD Program. The donation received was also used to sponsor research presentations by MD/PhD trainees at national and international research meetings. The staff and students are deeply indebted to the two organizations for their unfailing support of the MD/PhD Program over the past few years, particularly since the MD/PhD Program does not receive budgeted operational funding from any other sources.

The third annual UBC MD/PhD Student Research Forum and Open House was held on Monday, 19 August 2002 at the Peter Wall Institute for Advanced Studies, University Centre, UBC Campus. The forum turned out very well, about 30 faculty members, staff, students, guests, potential applicants and others attended this event (excluding the MD/PhD Program staff and students). Big welcome by Dr. John Cairns, Dean of the Faculty of Medicine, and Dr. Lynn Raymond, Co-Director of MD/PhD Program, set off the exciting half-day event.

Seven MD/PhD students presented at the forum. Two hours of student presentation was concluded with past UBC Clinical Investigator Program Trainee, Dr. John Gill's innovative and entertaining presentation.

Discussion on issues in training of clinician-scientist was led by Dr. Bruce McManus, Scientific Director of the CIHR Institute of Circulatory and Respiratory Health, and Co-Director of the iCAPTURE Centre at UBC, Dr. Anthony Chow, UBC MD/PhD Program Director, and Dr. Peter Paré, Director of UBC Clinical Investigator Program, and Co-Director of the iCAPTURE Centre at UBC.

## MD/PhD Student Research Forum and Open House: 19 August 2002 (con't)

Student Presentation	Hosting Department	Research Supervisor
Jimmy Lee (Year 6)	Pathology & Laboratory Medicine	Dr. Neil Reiner
◀ Distinct PI3-kinase Isoform Regulates Phagocytosis		
Ryan Hung (Year 5)	Experimental Medicine	Dr. Anthony Chow
◀ The G31R Mutant of Toxic Shock Syndrome Toxin-1: Intrinsic and Extrinsic Pathways for Apoptosis		
Michael Rauh (Year 4)	Experimental Medicine	Dr. Gerry Krystal
◀ Resting SHIP-deficient Murine Peritoneal Macrophages Display an Anti-inflammatory Phenotype		
Claire Sheldon (Year 4)	Physiology	Dr. John Church
◀ Intracellular Ph Regulation During Anoxia in Acutely Isolated Rat Hippocampal CA1 Neurons		
Paul Yong (Year 4)	Experimental Medicine	Dr. Wendy Robinson
◀ Preeclampsia and Confined Placental Mosaicism		
Clara Tan (Year 3)	Biochemistry & Molecular Biology	Dr. Shoukat Dedhar
◀ The Role of Integrin-linked Kinase in Angiogenesis		
Liam Brunham (Year 2)	Medical Genetics	Dr. Michael Hayden
◀ Functional Analysis of Mutations and cSNPs in the <i>ABCA1</i> Gene		

A highlight of the MD/PhD student year is the annual Student Research Forum and Open House. This annual function provides a valuable opportunity for the MD/PhD students to showcase their research. It also provides an occasion to promote the training of clinician-scientists to the University community and the public. At the forum, MD/PhD students have the opportunity to talk to various graduate advisors, supervisors, students, and potential applicants. MD/PhD students also provide valuable information and serve as a resource for potential applicants to the MD/PhD Program.

The forum ended with a welcoming dinner enjoyed by invited faculty, staff, students and guests, including Ms. Rashmita Salvi and Ms. Judy Finch, Program Managers at the Michael Smith Foundation for Health Research.

## UBC MD/PhD Monthly Meetings

*Photo above:*

Enticing students to come to the MD/PhD monthly meetings with food and drinks.  
Standing (from left): Michael Rauh (Year 4), Paul Yong (Year 4), Bryan Coburn (Year 2), Ryan Hung (Year 5).  
Seated: (from left) Claire Sheldon (Year 4), Clara Tan (Year 3), Suvendrini Lena (Year 3), Liam Brunham (Year 2).

In 2001-2002, the first series of MD/PhD Monthly Meetings was implemented. This is a developing initiative and desire to respond to the needs of the MD/PhD students. Over the past year, these meetings have provided a casual forum in which the Program Director, Program Co-Director and MD/PhD students have had the opportunity to bring up important issues (e.g. tuition fees, upcoming conferences etc.). The meetings have also served as practice sessions for student conference presentations. As well, the students have used this monthly meeting to invite UBC clinician-scientists to speak informally about their experiences and provide advice for how to combine research with clinical practice. So far, we are very honoured to have met with the following topnotch UBC clinician-scientists at the meetings: Dr. Peter von Dadelszen (Obstetrics & Gynaecology), Dr. Lynn Raymond (Psychiatry), Dr. John Mancini (Medicine) and Dr. Ted Steiner (Infectious Diseases).

The second series of the student monthly meetings continues in 2002-2003. For more information on the MD/PhD Monthly Meeting, please contact Clara Tan at [htan@interchange.ubc.ca](mailto:htan@interchange.ubc.ca).

## MD/PhD Student Representative and Alternate Student Representative

**2002-2003**

\* \* \*

MD/PhD Student Representative – **Claire Sheldon**.  
MD/PhD Alternate Student Representative – **Clara Tan**.

One of the major jobs for the student representative is to assist with the MD/PhD Monthly Meetings. Another major duty of the student representative is to sit on the MD/PhD Advisory Committee and the MD/PhD Admissions Committee.

We would also like to take this opportunity to thank Claire Sheldon and Cheng-han Lee (past student representative) for their outstanding effort in editing the UBC MD/PhD Survival Manual for the current and future MD/PhD students.

*Photo on right:*

Claire Sheldon thanked the audience after she received the “gavel” from Jimmy Lee, past student representative, at the Open House Welcoming Dinner (19 August 2002).

## Claire Sheldon - MD/PhD Student Representative

Claire is a fourth year MD/PhD student and is completing the PhD portion of her degree within the Department of Physiology, under the supervision of Dr. John Church. There are two major themes to Claire's research: firstly, she is interested in examining the mechanisms that regulate intracellular pH in hippocampal neurons. It is well established that there are three major pH regulatory mechanisms in neurons in the central nervous system. There are two HCO<sub>3</sub><sup>-</sup>-dependent mechanisms and at least one HCO<sub>3</sub><sup>-</sup>-independent mechanism, the Na<sup>+</sup>/H<sup>+</sup> exchanger. Claire's data suggests that the Na<sup>+</sup>/H<sup>+</sup> exchanger in the hippocampus is a novel isoform, as well as suggesting that another, as yet, uncharacterized mechanism (possibly a proton channel) also acts to regulate pH<sub>i</sub>. These data are exciting because changes in pH<sub>i</sub> are observed during neuronal activity and, in turn, feedback and influence neuronal excitability. Thus, changes in pH<sub>i</sub> may be linked to disorders such as epilepsy.

Secondly, Claire is interested in understanding how neurons react to a period of energy deprivation, as would be seen during a stroke. She uses various fluorescent dyes to directly measure changes in pH<sub>i</sub>, [Na<sup>+</sup>]<sub>i</sub> and [Ca<sup>2+</sup>]<sub>i</sub> during and following periods of anoxia (oxygen deprivation). Because changes in the intracellular concentrations of each of these cations are central determinants of neuronal death after stroke, Claire would like to understand how the observed ionic changes are produced. She has

been examining the possible contributions of plasma membrane transporters and ion channels to the observed ionic changes and has shown that the activities of plasma membrane transporters, such as the Na<sup>+</sup>/H<sup>+</sup> exchanger, are influenced significantly by periods of anoxia. However, other transport mechanisms also contribute to the complex ionic response to anoxia, including the Na<sup>+</sup>/Ca<sup>2+</sup> exchanger and non-selective cation channels. Beyond simply understanding what mechanisms are involved, Claire is interested in understanding how these various membrane transporters are regulated to change their activities during anoxia. Anoxia induces dramatic changes in intracellular second messenger systems which may then influence the activities of various transporters and channels. Claire believes that it is important to understand the mechanisms which lead to the dramatic changes in pH, sodium and calcium inside neurons during a stroke-like event because these ionic changes begin a cascade of complex and interlinking events which eventually determine the survival of the neurons.

In the future, Claire wishes to combine her enthusiasm for research with her dedication to patient treatment and, hopefully make an impact on the field of neurological studies. Claire volunteers casually at the Community Health Initiative University Students (CHIUS) medical clinic and, in the future, she wishes to continue to serve underprivileged communities in any capacity as she is able.

Claire Sheldon

## CSCI/CIHR Joint Program: Young Investigators Forum, Ottawa

Eight MD/PhD students presented at the Canadian Society for Clinical Investigation (CSCI) Young Investigator's Forum, 26-28 September 2002, Ottawa, Ontario. Claire Sheldon was the only student from UBC to do an oral presentation (that comes with being a finalist in the poster competition).

- ◆ **Jimmy Lee** (Year 6), Pathology & Laboratory Medicine (Dr. Neil Reiner)
  - Distinct PI3-kinase isoform regulates phagocytosis
- ◆ **Ryan Hung** (Year 5), Experimental Medicine (Dr. Anthony Chow)

## Partial List of Research Conferences Attended/Presented by Current MD/PhD Students during the Past Year

Student	Supervisor and Hosting Department	Research Conference Attended/Presented	Title of Presentation
<b>Ryan Hung</b> Year 5	Dr. Anthony Chow Experimental Medicine	Experimental Biology Meeting, New Orleans, Louisiana, USA 20 – 24 April 2002	Paper presented: Regulation of Apoptosis by Toxic Shock Syndrome Toxin- 1 and the Mutant G31R
<b>Michael Rauh</b> Year 4	Dr. Gerry Krystal Experimental Medicine	Keystone Symposium B8: NF- kappaB: bench to bedside. Keystone, CO, USA 25 February – 3 March 2002	Paper presented: The SH2-Containing Inositol 5-phosphatase (SHIP) is a Negative Regulator of Macrophage Development and Activation
<b>Michael Rauh</b> Year 4	Dr. Gerry Krystal Experimental Medicine	31st Annual Meeting of the International Society for Experimental Hematology (ISEH), Montreal, Quebec, Canada 5 – 9 July 2002	Paper presented: SHIP Deficient Murine Peritoneal Macrophages are Impaired in LPS/IFNg- induced NO Secretion because of a Dramatic Overproduction of L-arginase
<b>Michael Rauh</b> Year 4	Dr. Gerry Krystal Experimental Medicine	44th Annual Meeting of the American Society for Hematology (ASH), Philadelphia, PA, USA 6 – 10 December 2002	Paper presented: SHIP-deficiency Leads to Anti-inflammatory Macrophage Programming and Endotoxin Tolerance
<b>Claire Sheldon</b> Year 4	Dr. John Church Physiology	Satellite Symposium of IUPHAR, Advances in Na-H Exchange Research: From Molecular Regulation to Therapeutic Development, London, Ontario, Canada July 2002	Poster presented: Intracellular pH Regulation during Anoxia in Acutely Isolated Rat Hippocampal CA1 Neurons
<b>Paul Yong</b> Year 4	Dr. Wendy Robinson Experimental Medicine	American Society of Human Genetics, Baltimore, MD, USA 15 – 19 October 2002	Paper presented: Preeclampsia and Confined Placental Mosaicism
<b>Paul Yong</b> Year 4	Dr. Wendy Robinson Experimental Medicine	International Federation of Placenta Associations, Melbourne, Australia 6 – 10 October 2002	Paper presented: Preeclampsia and Confined Placental Mosaicism: A Possible Association
<b>Liam Brunham</b> Year 2	Dr. Michael Hayden Medical Genetics	Genomics and Public Policy Symposium, Toronto, Ontario, Canada 7 – 8 June 2002	Paper presented: From Darwin to Celera: Challenges to the integrity of the Scientific Enterprise

## MD/PhD Barbecue

The MD/PhD students, Dr. Lynn Raymond and Jane Lee, enjoyed a pleasant evening at Dr. Anthony Chow's residence on 19 July 2002. The barbecue was so much fun and Dr. Chow's chicken wings and salmon were yummy! After the food, we exercised ourselves in the field and took some wonderful pictures.

**Thanks Dr. Chow!**

## Dr. Anthony Chow is on Sabbatical

Dr. Anthony Chow is currently on sabbatical at the University of California, San Diego (October 2002 – September 2003). Any issues related to the MD/PhD Program should be addressed to Dr. Lynn Raymond, Co-Director of the UBC MD/PhD Program, email at [lynnr@interchange.ubc.ca](mailto:lynnr@interchange.ubc.ca).

## Congratulations!

### Ryan Hung

won a \$800 US Travel Award from the American Federal for Medical Research for presenting at the Experimental Biology Meeting 20-24 April 2002, New Orleans.

Ryan Hung

### Liam Brunham

won a GREAT Award at the Science Council of British Columbia (September 2002 - August 2003). Amount value \$20,000.

Liam Brunham

## Upcoming Events

### \*MD/PhD Program Advisory Committee

Dr. Lynn Raymond, Co-Director of the MD/PhD Program, is in the process of revising the MD/PhD Program Advisory Committee. It is expected that there will be 10 new members joining the Committee in 2003. We would like to take this opportunity to thank the following members who have served on the Committee in the last three years. Dr. Jan Friedman (Medical Genetics), Dr. Ismail Laher (Pharmacology & Therapeutics), Dr. Raymond Pederson (Physiology) and Dr. Sam Sheps (Health Care & Epidemiology).

The Committee will be working on applicant selection in the next three months. Shortlisted candidates will be interviewed separately and independently by the MD/PhD Committee following initial screening in conjunction with the Faculty of Medicine Admissions Committee. There will be a committee meeting towards the end of March to finalize the ranking of applicants selected for interview.

### \*Western Student Medical Research Forum

Eight MD/PhD students will be presenting at the Western Student Medical Research Forum in Carmel, California (28 January 2003 – 1 February 2003). More details to follow in the next newsletter.

## Comments and Suggestions!

We welcome comments and suggestions to the UBC MD/PhD Program and to this Newsletter. Please send comments to the MD/PhD Program office, D452 - Heather Pavilion East, 2733 Heather Street, VHHSC, Vancouver, BC Canada V5Z 3J5. Phone: 1 604-875-5063. Fax: 1 604-875-4013. Email: [ubcmdphd@interchange.ubc.ca](mailto:ubcmdphd@interchange.ubc.ca). Website: <http://www.med.ubc.ca/mdphd>.
